

Data Quality Analyst

Reporting Line:	TBC (Senior ExCo Member)
Role Level:	5
Location:	Chester / Hybrid

About Us

We are Oxbury: The only UK bank dedicated to British agriculture. Founded by farmers, bankers, and technologists, we have combined the worlds of financial services, technology, and agriculture to provide bespoke financial products to support the rural economy.

Our mission is to create and grow a sustainable, customer-focused, and innovative bank that supports and champions the financial health of the rural economy.

About the Role

The Data Team plays a pivotal role in driving the business forwards. The role of the Data Quality Analyst is to be responsible for ensuring that data integrity is maintained across the banks core banking and support systems.

Predominantly responsible for:

- Identifying data quality issues, conducting root cause analysis suggesting, and once approved, delivering appropriate fixes
- Providing colleagues with information as to why data quality is important and the data integrity issues caused by non-adherence
- Monitoring data quality performance
- Assist and advise heads of departments to deliver appropriate fixes

Role Responsibilities

- Identify potential data quality issues at all stages of the data cycle
- Provide context on the reasons why data is a valuable asset which supports strategic decisions
- Recognise the needs of both internal stakeholder and customer needs
- Advocate for the importance of data quality. Working with teams across the business to drive data accuracy to enable reporting on products, customers, business operations, ESG, finance and sector
- Eliminate data terrorism
- Implement data quality strategy and framework
- Establish and promote proactive strategies to prevent data quality issues from arising
- Build and maintain strong relationships with process owners and subject matter experts to secure lasting resolutions to data quality issues
- Work with various teams within the Bank to establish and maintain standards for managing data quality issues throughout the delivery lifecycle and in production
- Assist and assess the suitability of data in the design phase of new products and projects.

Skills / Experience

Essential

- Proven experience as a Data Quality Analyst or in a similar role
- Supported data quality/governance initiatives
- Ability to interpret legal contracts / policies to 'real' actions and solutions
- Understanding of the Data Lake architecture and datasets
- Able to communicate effectively to a wide range of technical and non-technical stakeholders
- Good Microsoft Word, Excel and reporting skills

Desirable

- Background in Data Quality and Governance
- Understanding of customer datasets and how they are used by the Performance Analysts
- Excellent communication and stakeholder management skills
